

Freddy Bowser

MOBILE, EFFECTIVE, DURABLE

The new Freddy Oil and Coolant bowser is a safe and easy way to transport clean fluids around a workshop for filling or topping up of machines. Like the rest of the Freddy range it has been built with durability and practicality in mind. Fitted with a quick view sight gauge, heavy duty non-marking castors and made of robust mild steel.

Freddy Bowser

The Freddy Oil and Coolant bowser is a safe and easy way to transport clean fluids around a workshop for filling or topping up of machines, delivering fast transfer of the fluids - up to 85 litres per minute with the centrifugal pump fitted with hard faced seals (electric model) or 52 litres per minute for the air model fitted with a Samoa Pumpmaster.

The tank is baffled to eliminate unwanted shunt from the fluid sloshing in the tank.

Optional extras include a retractable Samoa Hose reel can be specified, and a Samoa Digital Hose End meter if monitoring fluid usage is important.

- **200 or 300 litre capacity**
- **Air operated, 110v or 240v**
- **Comes with 24 month warranty**
- **Optional retractable hose reel**
- **Optional digital hose end meter**
- **Also available in 304 or 316 stainless steel**
